

SkyWay Technologies Indonesia participates in the Golden Village program

Merdeka.com, Central Java - Transportation technology company PT SkyWay Technologies Indonesia has signed a memorandum of understanding to build transportation lines and improve connectivity in Dasun Village, Lasem District, Rembang, Central Java. Dasun Village is one of the 2,000 villages targeted by the Golden Village Program by the National Economic and Industrial Committee (KEIN).

SkyWay Technologies Indonesia is the only government partner to develop infrastructure transport technology. Previously, Skyway Technologies Indonesia has also signed a memorandum of understanding with Universitas Indonesia (UI) to build a transportation path in their campus environment in Depok, West Java.

SkyWay Technologies Indonesia is a subsidiary of Global Transport Investments, Inc., a legal entity applying SkyWay technology in Indonesia, and is part of SkyWay Technologies, Co., a Belarussian engineering company that manufactures high-tech means of transportation to meet the needs of connectivity urban areas, transportation of goods, high-speed transportation, inter-port transportation, inter-village and even inter-island.

The company's main mission is to provide the best solution of transportation and connectivity issues in Indonesia, which will drastically lower transportation costs, reduce travel time, be reliable and affordable. All of these will have a positive impact on lowering the logistics costs of goods and services, more efficient time and better level of comfort.

SkyWay is a floating ground transportation technology system, meaning its transport path uses only a small piece of land or land, and uses a high-tech buffer arrangement and is linked with a steel strip. Characteristic of this steel line is strong, rigid, flat, easy to produce and install, saving material consumption and can be used in various weather conditions. Specially designed electric vehicles will hang on the steel strip.

In addition to the opportunity to visit the famous Dasun Village for river tours, historical tours and fishery products, representatives of SkyWay Technologies Indonesia also had the opportunity to visit some Golden Village nominations, namely; The village of Karagede known as the agricultural and bioenergy village, Sumber Rejo Village is known for its plantation products such as sapodilla, teak and sugar cane and Karimunjawa Island which is known for its tourism, fishery and wood dewandaru charms.

SkyWay Technologies Indonesia has also started a preliminary meeting with PT Bukaka Teknika Utama, an engineering, procurement and development (EPC) company that is our partner to begin preparing for the implementation of the SkyWay.
